

PickD — What changed today

Wednesday, August 26, 2026 · for everyone on the Ludlow floor

The short version

1. Orders no longer say **LOW STOCK** for a bike that is sitting on the shelf under its "other" name.
2. Registering a new SKU from Double Check now clears the red badge right away — and it never offers to register the same SKU twice.
3. Every SKU now has **one** way to be written: the AS400 way, with the zero (**01-0530**). You can keep typing it short — the app finds it and saves it right.
4. Double Check now handles a LOW STOCK line **by itself**: it swaps the bike when it can, and when it can't it tells you exactly what it found and gives you the buttons right there — no Edit Order needed.

What you will notice

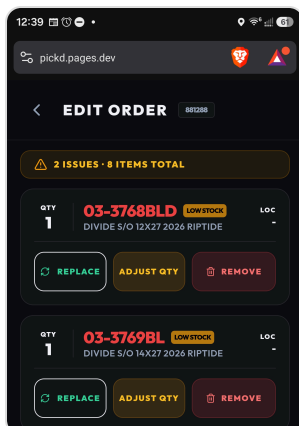

1. "LOW STOCK" on a bike that is right there

BEFORE

Some bikes exist under two names in the system — for example 03-3768BL and 03-3768BLD are the same Riptide. When an order asked for one name and the stock was filed under the other, the order came in as LOW STOCK with no location, and someone had to swap it by hand. It happened again this morning on order 881288 with 145 bikes on ROW 43.

NOW

The system checks both names and picks the one that actually has stock — when the order is created, and again when you open Edit Order. If a bike still shows LOW STOCK after this, it really is not on the shelf.

This morning, order 881288 in Edit Order: both Riptides flagged LOW STOCK with no location, while 145 and 76 of them sat on ROW 43 and ROW 41 under their other names. From today this resolves itself before anyone opens Edit Order (see point 4).

2. Registering a SKU from Double Check

BEFORE

Long-press → "Bike or Part" → save... and the card stayed red ("UNREG"). Long-pressing again offered to register it a second time, which created duplicates. Behind the curtain, 96 half-registered SKUs had piled up with nothing on any shelf.

NOW

The moment you save, the card turns normal. If you saved it with 0 units, long-press shows that row with an **Edit** button — add the quantity there, don't register again. The 96 leftovers were cleaned up (the ones with real history were kept).

3. One way to write a SKU

AS400 always writes the number with four digits: 01 0288. Over time we ended up with three spellings of the same thing — 01-0288, 01-288, 010288 — and the same part could be counted under two of them. From today the system saves every SKU the AS400 way, no matter how it is typed:

YOU TYPE	PICKD SAVES	
01-530	01-0530	zero added
033768BLD	03-3768BLD	dash added
03 3768 BLD	03-3768BLD	spaces become the dash
700106BK	70-0106BK	dash added
PKD-252HEX · 792282670112 · Y22B010415	unchanged	internal codes, barcodes and serial numbers stay as they are

Searching works the same way: type 31-75 and you get 31-0075. Today 108 existing names were corrected, and the full history of each one moved with it — nothing was lost. Twenty-two of them were the **same part filed under two names**; those two counts are now under one name. **The shelves did not change.** That is the list on the next page.

What we need from the floor: for the 22 parts on the next page, confirm that the two spots really hold the same part. If one of them is something different, tell Rafael and it gets its own name.

4. LOW STOCK no longer waits for Edit Order

BEFORE

Double Check showed the yellow LOW STOCK or red UNREG badge and nothing else. To find out *why* — and to do anything about it — you had to open Edit Order, where

NOW

The moment the order is on screen, Double Check checks the stock itself. If the same bike has enough units under its other name, it swaps it for you and says so (with an **Undo**). If not, a note under the card says

the automatic swap and the suggestions lived.

exactly what it found, and the buttons for that one line are right there.

WHAT THE NOTE SAYS	WHAT IT MEANS	BUTTONS YOU GET
Swapped from 03-3768BLD — same bike, this name has the stock	Solved on its own	Undo
Only 2 available of 5 — ROW 43 (2)	There is some, not enough	Take 2 · Replace · Remove
3 on the shelf — ROW 41 (3) — but 3 already reserved by 881290	Units exist but another open order has them	Replace · Remove
Registered, but 0 units in any location	Known SKU, nothing on any shelf	Use (closest match) · Replace · Remove
Not in PickD — this SKU has no catalog entry	Nobody has registered it yet	Register · Replace · Remove

Every button asks for a reason, same as Edit Order, and writes the same note on the order. "Replace" opens Edit Order already on the search for that line.

Mentioned only, so you know it happened

- These changes are locked in place: the system itself now refuses a second spelling of a SKU, keeps the LOW STOCK / UNREG status up to date on its own, and won't create half-registered SKUs anymore.
- The order scanner on the Bay 2 laptop needs its update installed (Rafael) — until then, new orders may still arrive with the old spelling, and Edit Order fixes them on open.
- Every renamed SKU shows its old name in History as "Was: ...", and there is a full list of what was renamed.

Coming up

- **Assist mode in Double Check** (new idea logged today): when an order has several pallets, a second person can join the same order and verify a pallet while the first person verifies another — one order, two people, no waiting.
- The physical check of the 22 merged parts (next page).

Please check on the floor — 22 parts that were filed under two names

"Old name" no longer exists in PickD; both counts now live under "Name now". Most of these came in with the original inventory list back in March already under both names, and none has ever appeared on an AS400 order — which is why nobody caught it until now. Confirm each pair is the same part.

OLD NAME	NAME NOW	WHERE IT IS COUNTED NOW (UNITS)	DESCRIPTION IN PICKD
01-077	01-0077	ROW 20 (1)	Hudson 17" Gloss Black
01-145	01-0145	ROW 20 (1)	Hudson St 14" Blue Lagoon
01-288	01-0288	— (0 units)	Explorer A1 ST 16" Teal
01-293	01-0293	ROW 20 (1)	Hudson St 14" Sugar Grape
01-429	01-0429	ROW 20 (1)	Hudson St 14" Vanilla Mint
01-513	01-0513	SD (1)	Explorer A2 19" Gloss Black
12-850	12-0850	D3 (99), D9 (22)	JRP pivot S-stay Dakar XCR 07-08
128338BK	12-8338BK	H19 (22)	Taxi part chainguard 2019+
23-400BK	23-0400BK	E14 (120), D1 (33), E3 (27)	Stem ATB cromo 1x40x115mm w/ hole, black
23-400SL	23-0400SL	E14 (150), E9 (10)	Stem ATB cromo 1x40x115mm, silver
23-404	23-0404	D6 (840), E14 (60)	Stem w/o logo 22.3mm black
29-200	29-0200	E76 (300), D21 (25)	Brake part center-pull cable holder, steel
31-75	31-0075	E71 (1350), E81 (900)	White cable / brake cable inner-outer front — two different descriptions, please check
31-250BL	31-0250BL	E71 (16), E76 (16)	Violet bicycle cables
36-305	36-0305	D26 (95)	Brake Changstar drum band 12 white — both counts were in D26, now one row of 95
650022	65-0022	FDX STATION (40)	JRP hanger Renegade S3/S4 (1.5)
66-109BK	66-0109BK	D11 (100), D16 (100), D17 (100), E16 (96), E20 (96)	Cyclerite stem BK
66-110BK	66-0110BK	E11 (514), D11 (65), D16 (65), D17 (65)	Cyclerite stem black
66-110SL	66-0110SL	E12 (132), E20 (131), D11 (35), D16 (35), D17 (35)	Cyclerite stem SL
66-377SL	66-0377SL	E47 (79)	Cyclerite 1/2 DX style pedal — both counts were in E47, now one row of 79
66-517	66-0517	E20 (22), D1 (15)	Cyclerite 4-bolt stem
66-525	66-0525	D11 (100), E9 (8)	Stem Cyclerite threadless 1 1/8 90mm
